SANTHEEPKUMAR VEERASAMY

PRINCIPAL SOFTWARE ENGINEER | ENTERPRISE SYSTEMS ARCHITECT & TECHNICAL LEADER

+91 86676 62978 • devsantheep@gmail.com • linkedin.com/in/santheepkumar • github.com/Santheepkumar • **strawhatdevs.com** • **YouTube (@StrawHatDevs)** • sk.strawhatdevs.com

---

PROFESSIONAL SUMMARY

Accomplished **Principal Software Engineer and Enterprise Solutions Architect** with **7+ years of experience** defining technical vision, architecting distributed systems, and leading high-velocity engineering delivery across enterprise ecosystems. Comprehensive hands-on mastery spanning end-to-end cloud platforms (AWS/GCP), microservices architectures, reactive frontends, and automated CI/CD release engineering. Proven technical leader and organizational multiplier with a track record of establishing engineering governance, reducing cloud infrastructure costs, and mentoring cross-functional engineering pods to boost delivery velocity by **35%** while cutting defect escape rates. Known for de-risking complex technical initiatives—including compressing an 8-month enterprise MVP into 2 months as a solo architect (75% timeline reduction). Founder and Chief Architect of **Straw Hat Devs** (`strawhatdevs.com`) and technical educator with **200+ architecture and programming videos**, recognized for thought leadership in system design, distributed systems, and AI-assisted development practices.

CORE TECHNICAL COMPETENCIES

Strategic Architecture:	Distributed Systems, Microservices Topology, Event-Driven Architectures, Monorepos (Turborepo), REST/GraphQL, Redis, Kafka, RabbitMQ, Zero-Downtime Releases, High Availability (99.9% Uptime)
Cloud Infrastructure & CI/CD:	AWS (ECS, Lambda, S3, RDS, CloudFront, IAM), GCP, Docker, Kubernetes, GitHub Actions, Bitbucket Pipelines, Jenkins, Vercel, Infrastructure as Code, Sentry, Axiom
Leadership & Governance:	Multi-Pod Architectural Governance, Engineering Roadmapping, Code Review Standards, Automated Quality Gates, Cloud Cost Optimization, Cross-Functional Alignment, Mentorship
Full-Stack Engineering:	React, Next.js (App & Pages Router), TypeScript, JavaScript, Node.js, NestJS, Go (Golang), Express.js, React Native, Expo, Tailwind CSS, Responsive Web
Data Architecture & Modeling:	PostgreSQL, MongoDB, Supabase, TypeORM, Prisma, Mongoose, Data Modeling, Transaction Isolation, Database Indexing & Query Tuning
Quality & Testing:	Playwright, Jest, React Testing Library, End-to-End Automated Regression, CI/CD Deployment Gates, Static Analysis

FOUNDER, CREATOR & DEVELOPER COMMUNITY LEADERSHIP

Founder & Chief Architect | Straw Hat Devs (strawhatdevs.com)

Conceived, architected, and built a comprehensive developer learning platform from scratch using Next.js (App Router), Supabase, PostgreSQL, Sanity CMS, and Axiom with automated CI/CD. Designed project-based engineering curricula mentoring hundreds of developers in production-grade software engineering and system architecture.

> **Technical Content Creator & Educator (@StrawHatDevs):** Produced and published **200+ deep-dive videos** on software architecture, microservices, cloud deployments, full-stack frameworks, and distributed systems, establishing high-authority thought leadership.

PROFESSIONAL EXPERIENCE

Staff Engineer / Principal Architect | Tuna Software Solution

Jun 2025 – Present

- **Enterprise Architectural Ownership:** Owned the technical roadmap, architectural blueprints, and full delivery lifecycle across frontend, backend microservices, and DevOps for two concurrent enterprise software platforms.
- **Engineering Velocity & CI/CD Governance:** Instituted modern engineering standards across the organization, including automated CI/CD deployment pipelines (GitHub Actions/Docker), branch protection rules, automated test runners, and structured code reviews—increasing team delivery velocity by 35% and reducing defect escapes.
- **Platform Modernization & Web Migration:** Led the architectural transformation of an Android kiosk platform into a cloud-native web application, streamlining multi-device deployments and eliminating hardware operational friction.
- **Cross-Functional Leadership:** Served as principal technical authority interfacing with product leadership and executive sponsors, translating business goals into robust technical specifications and de-risking dependencies.

Senior Software Engineer & Lead Architect | Heady

May 2023 – Jun 2025

- **Enterprise Technical Leadership:** Served as lead architect and client-facing technical lead for tier-1 enterprise partnerships (HeyDay Skin Care, Chuck E. Cheese, The Lash Lounge), translating high-level business goals into scalable, production-grade applications.
- **Rapid MVP Delivery (75% Timeline Compression):** Architected and delivered the Chuck E. Cheese customer experience web platform MVP in 2 months as a sole contributor, compressing an estimated 8-month delivery timeline by 75% through modular system design and rapid iteration.
- **High-Availability Microservices Ecosystem:** Architected a microservices-based booking and eCommerce infrastructure for HeyDay Skin Care integrated with Boulevard API, Redis caching, and resilient AWS cloud services, sustaining 99.9% uptime during peak holiday booking surges.
- **DevOps & Pipeline Automation:** Engineered high-conversion booking engines and custom CRM subscription systems (The Lash Lounge & Vmeals) backed by automated Bitbucket/GitHub Actions deployment pipelines to AWS and Vercel.
- **Technical Mentorship & AI-Assisted Workflows:** Mentored 6+ junior and mid-level engineers in distributed system design, clean architecture, and modern AI-assisted engineering workflows.

Principal Software Engineer | HOD Digitals

Nov 2022 – May 2023

- **Team Leadership & System Scalability:** Provided technical direction and architectural governance to a distributed team of engineers across multiple concurrent client product lines.
- **Decoupled Architecture & Cost Optimization:** Architected decoupled microservices, relational database schemas (PostgreSQL), and cloud deployment blueprints that lowered cloud infrastructure expenditures while improving horizontal scalability under traffic spikes.
- **Stakeholder Governance:** Acted as primary technical bridge between engineering pods and executive business stakeholders, managing sprint commitments, mitigating delivery bottlenecks, and driving engineering predictability.

Software Engineer | HOD Digitals — Sep 2021 – Nov 2022

- **Full-Lifecycle Engineering:** Delivered scalable web applications from requirements analysis through deployment across multiple client projects.
- **API & UI Development:** Engineered high-throughput RESTful APIs and modern reactive user interfaces based on direct client feedback, accelerating feature velocity and user adoption.
- **CI/CD Integration:** Integrated automated testing suites into deployment pipelines, ensuring zero-downtime releases and high code coverage.

Full Stack Developer | Skematix Technologies — Dec 2019 – Sep 2021

- **Full-Stack Application Delivery:** Developed and maintained multiple responsive client web applications utilizing React, Node.js, Express, and databases, with an emphasis on seamless frontend-backend integration.
- **End-to-End Ownership:** Managed complete software development lifecycle from initial data schema design to UI execution, performance tuning, and server provisioning.

FEATURED ARCHITECTURAL HIGHLIGHTS & SYSTEMS

Straw Hat Devs Developer Platform

Complete end-to-end edtech platform featuring interactive courses, user authentication, streaming integrations, and observability.

Next.js • TypeScript • PostgreSQL • Supabase • Sanity • Axiom • Vercel CI/CD

Pony Up Self-Service IoT Retail Kiosk

Hardware-integrated Android kiosk system handling point-of-sale payments, barcode/QR scanning, cash drawers, and thermal receipt printing.

React Native • Expo • Android Kiosk Mode • IoT Peripherals • REST APIs

Chuck E. Cheese Web Platform

Rapid-turnaround customer interaction web app featuring frictionless QR code scanning, dynamic menus, and responsiveness. Built in 2 months.

Next.js • React • Tailwind CSS • CloudFront/AWS • Automated CI/CD

HeyDay Skin Care Booking & Shop Engine

High-concurrency booking widget and eCommerce app integrating third-party APIs (Boulevard), real-time inventory, and Redis caching.

React • Node.js • NestJS • Redis • AWS ECS/Lambda • Sentry • Boulevard API

Vmeals CRM & Subscription Management

Automated meal subscription workflow system with custom plan builders, billing cycles, and automated customer notifications.

Next.js • Node.js • Express • PostgreSQL • AWS • GitHub Actions

AMS Test Automation & Release Platform

End-to-end regression automation suite integrating with Bitbucket Pipelines to validate pre-release mobile and web builds.

Playwright • TypeScript • Bitbucket Pipelines • Docker

EDUCATION

Bachelor of Engineering (B.E.) — Computer Science & Engineering • Anna University, Tamil Nadu, India — 2015 – 2019
