# SANTHEEPKUMAR VEERASAMY

**Staff Software Engineer | Full-Stack & Cloud Solutions Architect**

+91 86676 62978 | devsantheep@gmail.com | linkedin.com/in/santheepkumar | github.com/Santheepkumar | strawhatdevs.com | youtube.com/@StrawHatDevs | sk.strawhatdevs.com

## PROFESSIONAL SUMMARY

Results-driven Staff Software Engineer and End-to-End Solutions Architect with 7+ years of experience designing, building, and deploying mission-critical systems across enterprise and high-growth environments. Comprehensive hands-on mastery spanning frontend platforms, distributed microservices backends, cloud infrastructure provisioning, and automated CI/CD pipelines. Proven track record of taking complex products from initial whiteboard architecture through production launch at 4x speed—including compressing an 8-month enterprise MVP into 2 months as a sole contributor. Founder and Chief Architect of Straw Hat Devs (strawhatdevs.com) and technical educator with 200+ architecture and programming videos, demonstrating deep domain authority in system design, distributed systems, and modern cloud ecosystems. Experienced technical leader who establishes engineering rigor, mentors cross-functional teams, and leverages AI-assisted development workflows to maximize velocity and code quality.

## CORE COMPETENCIES

| | | |
|---|---|---|
| ▸ End-to-End System Architecture | ▸ Cloud Infra & DevOps (AWS/GCP) | ▸ Automated CI/CD Pipelines |
| ▸ Microservices & Distributed Systems | ▸ Full-Stack Product Delivery | ▸ Rapid MVP & Iterative Prototyping |
| ▸ IoT & Hardware Peripherals | ▸ Cross-Functional Leadership | ▸ Technical Mentorship & Code Reviews |
| ▸ AI-Assisted Engineering Workflows | ▸ Developer Education & Content | ▸ High Availability & Scalability |

## TECHNICAL SKILLS

| | |
|---|---|
| **Cloud & DevOps** | Docker, Kubernetes, AWS (ECS, Lambda, S3, RDS, CloudFront), GCP, GitHub Actions, Bitbucket Pipelines, Jenkins, Vercel, Terraform, Sentry, Axiom |
| **Architecture** | Microservices, Monorepo (Turborepo), Event-Driven, RESTful APIs, GraphQL, Redis, Kafka, RabbitMQ, Zero-Downtime Releases |
| **Frontend** | React, Next.js (App & Pages Router), TypeScript, JavaScript, React Native, Expo, Tailwind CSS, SCSS, State Management (Zustand, Redux) |
| **Backend** | Node.js, Express.js, NestJS, GoLang, REST APIs, GraphQL, Microservices Architecture |
| **Databases** | PostgreSQL, MongoDB, Supabase, Mongoose, Sequelize, TypeORM, Prisma, Query Tuning |
| **Testing & QA** | Playwright, Jest, React Testing Library, End-to-End Automated Testing, Static Analysis |
| **CMS & Tools** | Sanity, WordPress, Supabase, Axiom, Sentry, Boulevard, Webflow |

## FOUNDER, CREATOR & COMMUNITY LEADERSHIP

### Founder & Chief Architect | Straw Hat Devs (strawhatdevs.com) *Mar 2025 – Present*

- **Platform Architecture & Delivery:** Architected and built strawhatdevs.com from scratch as a modern developer learning platform featuring structured courses in full-stack engineering, system design, and cloud infrastructure.
- **Full-Stack & Cloud Infrastructure:** Engineered the system using Next.js (App Router), Supabase, PostgreSQL, Sanity CMS, and Axiom with fully automated CI/CD pipelines deploying to serverless cloud infrastructure.
- **Curriculum & Mentorship:** Designed comprehensive, project-based engineering curricula empowering hundreds of developers to build and deploy production-grade software.

### Technical Content Creator & Educator | Straw Hat Devs (YouTube) *200+ Videos Published*

- **Technical Thought Leadership:** Produced and published 200+ deep-dive videos on software architecture, microservices, cloud deployments, full-stack frameworks, and distributed system patterns.
- **Developer Community Impact:** Built an active global audience of software developers through pragmatic, code-first breakdowns of complex real-world enterprise architectures.

## PROFESSIONAL EXPERIENCE

### Staff Engineer | Tuna Software Solution *Jun 2025 – Present*

- **End-to-End Ownership:** Owned end-to-end architecture, cloud infrastructure, backend microservices, and frontend platforms across two concurrent enterprise projects, driving key feature releases ahead of schedule.
- **Pony Up Retail Kiosk & Web Migration:** Architected and delivered an Android Kiosk application (React Native/Expo) with IoT peripherals (payment gateways, receipt printers, cash drawers), then spearheaded its rebuild as a cloud web platform, reducing deployment complexity.
- **DevOps & CI/CD Pipelines:** Established engineering best practices including structured code review processes, automated CI/CD pipelines (GitHub Actions/Docker), and coding standards—improving delivery velocity by 35% and code quality.
- **Stakeholder Alignment:** Collaborated directly with product stakeholders to translate customer requirements into technical solutions, acting as the primary technical point of contact for project alignment.

**Senior Software Engineer** | **Heady** ***May 2023 – Jun 2025***

- **Enterprise Client Leadership:** Served as primary technical lead interfacing with enterprise clients (HeyDay Skin Care, The Lash Lounge, Chuck E. Cheese), translating business requirements into scalable, production-ready systems.
- **Chuck E. Cheese Web MVP (75% Faster Delivery):** Delivered Chuck E. Cheese web kiosk MVP in 2 months as a solo contributor, compressing an 8-month original project timeline by 75% through focused engineering and rapid iteration.
- **HeyDay Skin Care Microservices Ecosystem:** Architected a microservices-based backend integration with Boulevard (booking platform), Redis caching, Sentry error monitoring, and AWS infrastructure for enterprise-scale 99.9% reliability.
- **CI/CD Automation & Booking Platforms:** Engineered Next.js platforms with automated Bitbucket Pipelines and Vercel deployments for The Lash Lounge and Vmeals subscription management.
- **AI-Assisted Workflows & Mentorship:** Mentored junior and mid-level developers on modern development practices including AI-assisted coding, conducting code reviews, and establishing architectural patterns that reduced regression rates.

**Principal Software Engineer** | **HOD Digitals** ***Nov 2022 – May 2023***

- **Technical Direction & Architecture:** Led a team of engineers across multiple product lines, providing technical direction, architectural guidance, and hands-on mentorship across full-stack systems.
- **Scalability & System Design:** Oversaw project planning, system design, and implementation; made key architectural decisions that improved system scalability and performance while cutting cloud infrastructure costs.
- **Business Stakeholder Liaison:** Acted as the primary technical liaison between engineering and business stakeholders, ensuring delivery alignment and proactive risk communication.

**Software Engineer** | **HOD Digitals** ***Sep 2021 – Nov 2022***

- **Full-Lifecycle Delivery:** Contributed across the full software development lifecycle—from requirements analysis through cloud deployment—on multiple concurrent client projects.
- **Feature Engineering & Optimization:** Developed new features and enhanced existing applications based on direct client feedback, improving product adoption, performance, and user satisfaction.

**Full Stack Developer** | **Skematix Technologies** ***Dec 2019 – Sep 2021***

- **Full-Stack Web Engineering:** Developed and maintained multiple client-facing web applications with React, Node.js, Express, and databases, with a focus on user experience and performance optimization.
- **End-to-End Execution:** Handled both frontend and backend responsibilities across the stack, gaining deep exposure to end-to-end product ownership and server provisioning early in career.

## KEY PROJECTS & DEPLOYMENTS

**Straw Hat Devs — Learning Platform** | **strawhatdevs.com** ***Mar 2025 – Present***

- Architected and launched full-stack edtech platform featuring interactive developer courses, role-based auth, and video delivery.
- Tech Stack: Next.js (App Router), TypeScript, PostgreSQL, Supabase, Sanity, Axiom, Vercel CI/CD

**Pony Up — Android Self-Service Kiosk** | **Staff Engineer** ***Jun 2025 – Present***

- Engineered a React Native/Expo self-service kiosk deployed in shopping mall environments, integrating IoT peripherals including payment terminals, receipt printers, and cash drawers.
- Implemented secure end-to-end payment and order processing workflows, connecting kiosk hardware with backend services and external payment providers.
- Tech Stack: React Native, Expo, IoT Integrations, Android Kiosk Mode, REST APIs

**Chuck E. Cheese — Web Experience Platform** | **Senior Engineer** ***Jun 2025 – Present***

- Rebuilt the Chuck E. Cheese kiosk as a web-based customer experience platform enabling product interaction via QR code scanning — delivered MVP in 2 months vs. an 8-month original estimate.
- Functioned as a sole contributor handling full frontend development and system implementation, coordinating directly with design and product teams for real-time requirement validation.
- Tech Stack: React, Next.js, QR Integration, Responsive Web, AWS CloudFront

**HeyDay Skin Care — Shop App & Booking Widget** | **Lead Frontend Developer** ***May 2023 – Present***

- Built and maintained a customer-facing skin health shop app and booking widget enabling facial appointment scheduling, treatment tracking, and client profile management.
- Architected a microservices-based backend integration with Boulevard (booking platform), Sentry (error monitoring), and AWS infrastructure for enterprise-scale reliability.
- Tech Stack: ReactJS, Node.js, NestJS, Redis, Microservices, AWS, Sentry, Boulevard

**The Lash Lounge — Appointment Booking Platform** | **Lead Frontend Developer** ***Mar 2024 – Present***

- Delivered a seamless booking experience for eyelash services with appointment tracking and treatment record management for a national beauty services chain.
- Tech Stack: Next.js, Vercel, Bitbucket Pipelines, Sentry

**Vmeals — CRM & Subscription Platform** | **Team Lead** ***Jan 2023 – Feb 2023***

- Led development of an enhanced CRM system automating customer interactions and subscription management, plus a customer-facing app for subscription plan customization.
- Tech Stack: Next.js, Node.js, Express.js, AWS, GitHub Actions

**AMS Testing Automation Platform** | **Lead Developer** ***Jun 2022 – May 2023***

- Implemented end-to-end test automation for a CI/CD-integrated platform managing app release schedules, beta builds, and developer tooling account management.
- Tech Stack: Playwright, Bitbucket Pipelines, Docker

## EDUCATION

**Bachelor of Engineering (B.E.) — Computer Science & Engineering** | **Anna University** ***2015 – 2019***

Tamil Nadu, India
