SANTHEEPKUMAR VEERASAMY

Forward Deployed Software Engineer | Enterprise Solutions Architect

+91 86676 62978 | devsantheep@gmail.com | linkedin.com/in/santheepkumar | github.com/Santheepkumar | strawhatdevs.com | youtube.com/@StrawHatDevs | sk.strawhatdevs.com

PROFESSIONAL SUMMARY

High-agency Forward Deployed Software Engineer and Enterprise Solutions Architect with 7+ years of experience embedding with enterprise clients to scope, architect, and deploy production software systems at 4x industry speed. Hands-on polymath with end-to-end mastery across the entire technical stack—spanning client-facing applications, backend microservices, cloud infrastructure provisioning (AWS/GCP/Docker/K8s), complex hardware/IoT integrations, and automated CI/CD pipelines. Proven track record of turning highly ambiguous business requirements into mission-critical, production-ready systems under aggressive deadlines—including delivering an enterprise customer-experience platform MVP in 2 months as a sole contributor (compressing an 8-month baseline by 75%). Battle-tested in customer-facing technical delivery for enterprise clients (HeyDay Skin Care, Chuck E. Cheese, The Lash Lounge), solving edge cases in the field, integrating legacy and third-party APIs, and maintaining 99.9% uptime. Founder of Straw Hat Devs (strawhatdevs.com) and technical educator with 200+ architecture and programming videos, exemplifying autonomous 0-to-1 execution and clear technical communication across technical and executive audiences.

CORE COMPETENCIES

▸ **Customer-Facing Technical Delivery**	▸ **Rapid MVP & 0-to-1 Execution**	▸ **End-to-End Enterprise Full-Stack**
▸ **IoT & Hardware Peripherals (POS/Printers)**	▸ **Third-Party & Legacy API Integration**	▸ **Cloud Infra Provisioning (AWS/GCP)**
▸ **Automated CI/CD & Field Deployments**	▸ **Field Troubleshooting & On-Call Triage**	▸ **Stakeholder Discovery & Scoping**
▸ **Microservices & Distributed Systems**	▸ **High Availability & 99.9% Uptime**	▸ **AI-Assisted Development Velocity**

TECHNICAL SKILLS

Customer Delivery	Enterprise Client Embedding, Requirements Discovery, Rapid MVP & 0-to-1 Execution, Technical Stakeholder Alignment, Production Troubleshooting & On-Call Triage
Full-Stack Architecture	React, Next.js (App & Pages Router), TypeScript, JavaScript, Node.js, NestJS, Go (Golang), Express.js, React Native, Expo, Tailwind CSS, Responsive Web
Cloud & CI/CD	AWS (ECS, Lambda, S3, RDS, CloudFront), GCP, Docker, Kubernetes, GitHub Actions, Bitbucket Pipelines, Jenkins, Vercel, Infrastructure as Code, Sentry, Axiom
Integrations & Hardware	IoT Peripheral Integration (Payment Terminals, Thermal Printers, Cash Drawers), Android Kiosk Mode, Third-Party APIs (Boulevard, Stripe), QR/Barcode Flows
Distributed Systems	Microservices, Event-Driven Architecture, PostgreSQL, MongoDB, Supabase, Redis (Caching/Rate Limiting), Kafka, RabbitMQ, Zero-Downtime Releases
Testing & Automation	Playwright, Jest, React Testing Library, End-to-End Regression Automation, CI/CD Deployment Gates
CMS & Tools	Sanity, WordPress, Supabase, Axiom, Sentry, Boulevard, Webflow

FOUNDER, CREATOR & COMMUNITY LEADERSHIP

Founder & Chief Architect | Straw Hat Devs (strawhatdevs.com) *Mar 2025 – Present*

- **Autonomous 0-to-1 Execution:** Independently conceived, architected, and deployed strawhatdevs.com, an interactive learning platform offering full-stack engineering, system design, and cloud infrastructure courses.
- **End-to-End Stack & Cloud Infra:** Engineered the entire platform using Next.js (App Router), Supabase, PostgreSQL, Sanity CMS, and Axiom with fully automated CI/CD pipelines deploying to serverless cloud infrastructure.
- **Technical Communication & Enablement:** Designed real-world project curricula and interactive workflows, empowering developers worldwide to build production-grade, enterprise-scale software.

Technical Content Creator & Educator | Straw Hat Devs (YouTube) *200+ Videos Published*

- **Clear Technical Communication:** Authored and published 200+ in-depth videos breaking down complex distributed systems, backend architectures, cloud configurations, and modern full-stack frameworks.
- **Community Authority:** Built an active international developer audience by demonstrating how to translate complex system architectures into clean, pragmatic, production-ready code.

PROFESSIONAL EXPERIENCE

Staff Engineer / Forward Deployed Solutions Lead | Tuna Software Solution *Jun 2025 – Present*

- **Enterprise Client Delivery:** Owned end-to-end technical delivery across frontend, backend, cloud infrastructure, and DevOps for two concurrent high-priority enterprise client engagements.
- **Pony Up IoT Retail Kiosk (Field Deployment):** Architected, built, and deployed an Android self-service kiosk using React Native/Expo integrated with physical IoT hardware peripherals (credit card payment terminals, thermal receipt printers, cash drawers) operating in high-traffic shopping malls.
- **Zero-Downtime Hardware & Web Migration:** Spearheaded the strategic rebuild and migration of the retail kiosk architecture into a cross-platform, cloud-hosted web system, eliminating physical on-site deployment bottlenecks and ensuring multi-device operational stability.
- **Continuous Deployment & Infra Setup:** Built automated CI/CD pipelines (GitHub Actions/Docker) and observability dashboards, accelerating feature rollout cycles and enabling instant, zero-downtime remote updates to kiosks in the field.
- **Client Discovery & Alignment:** Collaborated directly with client-side business and operational stakeholders to translate on-ground operational hurdles into robust, automated software workflows.

Senior Forward Deployed Engineer & Client Lead | Heady *May 2023 – Jun 2025*

- **Enterprise Account Ownership:** Served as the lead customer-facing software architect for major enterprise clients (HeyDay Skin Care, Chuck E. Cheese, The Lash Lounge), translating ambiguous client requirements into high-impact, production-ready systems.
- **Chuck E. Cheese Web Platform (75% Faster Time-to-Market):** Sole engineer responsible for architecting and deploying an interactive customer experience web platform featuring QR code scanning. Delivered the production MVP in 2 months versus an initial 8-month client estimate, reducing time-to-market by 75%.
- **HeyDay Skin Care Microservices & Enterprise Integration:** Architected a robust microservices layer integrating the client's eCommerce and booking workflows with the Boulevard API, Redis caching, and resilient AWS infrastructure, sustaining 99.9% uptime during nationwide holiday booking spikes.
- **Rapid Client Rollouts:** Engineered high-converting booking workflows and automated subscription CRM engines for The Lash Lounge and Vmeals, deploying via automated Bitbucket/GitHub Actions pipelines to AWS and Vercel.
- **Accelerating Delivery via AI-Assisted Workflows:** Leveraged and coached team members on AI-assisted coding and testing workflows to accelerate client delivery cycles and unblock complex edge cases in record time.

Principal Software Engineer / Solutions Architect | HOD Digitals *Nov 2022 – May 2023*

- **Client Solution Architecture:** Led solution design and execution across multiple concurrent client product engagements, defining system architecture and technology stacks tailored to each client's business goals.
- **Infrastructure Cost Optimization & Scalability:** Redesigned client backend services and database architectures (PostgreSQL/MongoDB), lowering cloud hosting costs while hardening systems against sudden traffic surges.
- **Technical Liaison:** Acted as the primary technical point of contact between enterprise client stakeholders and engineering pods, resolving technical ambiguities, mitigating implementation risks, and ensuring on-time delivery.

Software Engineer | HOD Digitals *Sep 2021 – Nov 2022*

- **Rapid Client Feature Engineering:** Developed full-stack web applications across multiple concurrent client accounts from initial scoping to cloud deployment.
- **Direct Feedback Iteration:** Partnered with product managers and clients to rapidly iterate on feedback, releasing performant RESTful APIs, modern reactive user interfaces, and automated data processing pipelines.
- **CI/CD Quality Control:** Implemented automated testing routines within deployment pipelines, ensuring zero-regression releases to client production environments.

Full Stack Developer | Skematix Technologies *Dec 2019 – Sep 2021*

- **Client Web Application Delivery:** Developed, optimized, and deployed multiple client-facing responsive web applications with React, Node.js, Express, and databases.
- **Full Lifecycle Ownership:** Managed full application lifecycle from initial data modeling and frontend implementation to server provisioning and deployment.

FEATURED CLIENT DEPLOYMENTS & SYSTEMS

Chuck E. Cheese — Customer Experience Platform | Solo Lead Engineer *Jun 2025 – Present*

- Rapid-turnaround web platform featuring seamless QR-code interaction and mobile menus. Architected, coded, and deployed end-to-end in 2 months.
- Tech Stack: Next.js, React, Tailwind CSS, CloudFront/AWS, Automated CI/CD

Pony Up — IoT Retail Kiosk System | Staff Solutions Engineer *Jun 2025 – Present*

- End-to-end hardware-integrated Android kiosk system handling point-of-sale payments, barcode/QR scanning, cash drawers, and thermal receipt printing.
- Tech Stack: React Native, Expo, Android Kiosk Mode, IoT Peripherals, REST APIs

HeyDay Skin Care — Booking & Shop Engine | **Lead Enterprise Architect** ***May 2023 – Present***

- High-concurrency booking widget and eCommerce app integrating third-party booking APIs (Boulevard), real-time inventory, and Redis caching on AWS.
- Tech Stack: React, Node.js, NestJS, Redis, AWS ECS/Lambda, Sentry, Boulevard API

Straw Hat Devs Developer Platform | **strawhatdevs.com** ***Mar 2025 – Present***

- Complete full-stack edtech platform with real-time auth, payments/courses, video delivery, and automated CI/CD.
- Tech Stack: Next.js, TypeScript, PostgreSQL, Supabase, Sanity, Axiom, Vercel CI/CD

Vmeals — CRM & Subscription Management Platform | **Client Delivery Lead** ***Jan 2023 – Feb 2023***

- Automated meal subscription workflow system with custom plan builders, billing cycles, and automated customer notifications.
- Tech Stack: Next.js, Node.js, Express, PostgreSQL, AWS, GitHub Actions

AMS Test Automation & Release Platform | **Lead Developer** ***Jun 2022 – May 2023***

- End-to-end regression automation suite integrating with Bitbucket Pipelines to validate pre-release mobile and web builds prior to app store distribution.
- Tech Stack: Playwright, TypeScript, Bitbucket Pipelines, Docker

EDUCATION

Bachelor of Engineering (B.E.) — Computer Science & Engineering | **Anna University** ***2015 – 2019***

Tamil Nadu, India
